Dear Search Committee:

With over 60 credit hours of teaching and 10 years experience as a College Lab Assistant I in Mathematics at Central Lakes College in Brainerd, Minnesota, I have gained valuable experience helping students develop their math skills. Earning a Master of Arts in Learning and Technology gave me the opportunity to learn and put into practice current teaching pedagogy particularly in mathematics. To enhance my degree I also have 18 semester graduate hours in Mathematics.

Given my interest in guiding the academic development of college students, the following qualifications will assist in the evaluation of my candidacy:

- Master of Arts in Learning and Technology (Education) with an additional 18 semester graduate math credits
- Teach Pre-College Mathematics in a Math Lab setting using MyMath Lab
- Interactive television and online teaching experience
- Eagerly promotes student learning in a community college setting; assisted with recruitment and retention events; assisted with new student advising / orientation / registration
- Skilled at creating effective student-centered instructional materials and incorporating current technology to aid in teaching
- Anime Club Advisor

What I bring to the position that may be unique among other candidates is my background in disability services and training. In working with students with disabilities, I have gained valuable experience in developing strategies that address different learning styles. I feel this experience augments my instructional background and would provide a unique perspective to students in my future classes.

I look forward to a meeting where we can discuss how my skills can best serve your needs.

Thank you for your time and consideration.

Sincerely,

Kathryn Maloney
